01	Rafael ALIPIO, Audine DE MIRANDA - Influence of frequency-dependent characteristics of grounding and line models on transient overvoltages in overhead lines	1
02	Rafael ALIPIO, Renan SEGANTINI - Electromagnetic disturbances propagation along a grounding grid subjected to lightning currents	5
03	Kamil FILIK, Grzegorz MASŁOWSKI, Grzegorz KARNAS, Paweł SZCZUPAK, Lesław KARPIŃSKI, Robert ZIEMBA, Stanisław WYDERKA - Applications of impulse current and voltage generators dedicated to lightning tests of avionics	9
04	Saulius GUDŽIUS, Alfonsas MORKVĖNAS, Dovilė BRAZIONIENĖ, Vidmantas TIČKA, Ugnė ILIOITIENE, Audrius JONAITIS, Virginijus VASYLIUS, Kęstutis JASIŪNAS – Experimental Investigation of Switching Overvoltages of Shunt Reactor	13
05	Jozef HALLON, Karol KOVÁČ, Mikuláš BITTERA - Comparison of coupling networks for EFT Pulses Injection	17
06	Eisuke HANADA, Kai ISHIDA, Takato KUDOU - Newly identified electromagnetic problems with medical telemetry systems	21
07	Kai ISHIDA, Sazu ARIE, Kaoru GOTOH, Eisuke HANADA, Minoru HIROSE, Yasushi MATSUMOTO - Electromagnetic compatibility of wireless medical telemetry systems and light-emitting diode (LED) lamps	25
08	Krzysztof MANIAK, Tomasz TOMCZYK - Electromagnetic compatibility in distributed power systems	29
09	Renata MARKOWSKA, Karol ANISEROWICZ - Lightning currents and overvoltages in underground radiating cables of intrusion detection system	34
10	Grzegorz MASŁOWSKI, Robert ZIEMBA, Tomasz KOSSOWSKI - Overvoltage induced in overhead power lines by nearby lightning stroke	41
11	Marek P. MICHALAK - Alternative electromagnetic compatibility methods tests of mining equipment	45
12	Marek P. MICHALAK, Monika E. SZAFRAŃSKA – EMC in IoT World	50
13	Maria Alejandra MORA¹, Lyse-Aline COYITANGIYE¹, Michel CUCCHIARO - Electromagnetic fields radiated by high speed railway lines, application case: cover slab over the railway lines	54
14	Adam NIKOŁAJEW - Undersampling applied for measurements of nonlinear object characteristics in presence of disturbances	58
15	Artur NOGA, Andrzej KARWOWSKI, Tomasz TOPA - Evaluation of the Magnetic Field Inside Grid-Like Large Volume Shields For Protection Against LEMP	62
16	Artur NOGA, Dariusz WÓJCIK, Maciej SURMA - Influence of Layer Stackup and Decoupling Capacitors Placement on Power Delivery Network Impedance	66
17	Artur NOGA, Dariusz WÓJCIK, Maciej SURMA - Full-wave Numerical Analysis of EEG Device Radiated Immunity	70
18	Arnolda ROŽANSKIENĖ, Linas MARKEVIČIUS - Evaluation of electromagnetic processes in high voltage OHL by transient fast analysis models	74
19	Ewa ŚWIERCZ - Image encryption algorithms based on wavelet decomposition and encryption of compressed data in wavelet domain	79
20	Dariusz WÓJCIK, Maciej SURMA, Mirosław MAGNUSKI, Artur NOGA, Jan MOCHA - Experimental Verification of Susceptibility to EMI of Operational Amplifiers	84
21	Andrzej ZANKIEWICZ - Experimental analysis of susceptibility of IEEE 802.11ac Wave 1 networks to adjacent and co-channel interference	88
22	Piotr BOROWIK - Selected measurement methods of delay line parameters with acoustic surface wave	92
23	Stanisław ŻUREK, Piotr BOROWIK, Krzysztof CHWASTEK - Anisotropy of loss density of chosen electrical steel sheets	96
24	Wojciech PLUTA - Calculating power loss in electrical steel taking into account magnetic anisotropy	100
25	Maciej OZIEMBŁOWSKI, Magdalena DRÓŻDŻ, Tadeusz JULISZEWSKI, Karolina TRZYNIEC - Ultra weak luminescence (USL) as a potential method for evaluating the quality of traditional food	104

Contents

26	Łukasz JANUSZKIEWICZ - Interaction of 5 generation wireless systems with human body-computer simulations issues	104
27	R.A. PRIYA, D. DHANASEKARAN, P.C. KISHORERAJA - Performance Analysis of PMSG Based Wind Energy Conversion System Using Two Stage Matrix Converter	112
28	Sabrije OSMANAJ, Bardhyl SYLEJMANI, Myzafer LIMANI, Rexhep SELIMAJ - An experimental study of passive methods for islanding detection and protection system of the inverter operation	118
29	Małgorzata GÓRCZEWSKA, Sandra MROCZKOWSKA, Przemysław SKRZYPCZAK - Lighting of sculptures and monuments	124
30	Kamil KUBIAK - Shaping reflector for asymmetric LED floodlighting reflector	128
31	Marek KURKOWSKI - Analysis of lighting and electrical parameters in road installations with discharge luminaires and voltage regulators	134
32	Marcin LEGIERSKI, Piotr MICHAŁEK - Automated measurement system for getting total luminous distributions using imaging luminance measurement device	138
33	Ewa PIOTROWSKA, Maciej ZAJKOWSKI - Analysis of luminance distributions of selected skylights	142
34	Mateusz PROROK, Maciej ZAJKOWSKI - The analysis of colorimetric parameters dynamic changes capabilities for optical-illumination system cooperating with isolated phosphor	146
35	Magdalena SIELACHOWSKA, Maciej ZAJKOWSKI - Preliminary analysis of the possibility of using reflected light from the Moon to improve the energy efficiency of road lighting	152
36	Agnieszka WOLSKA - Biologically effective lighting on shift workstations	156
37	Wojciech GRZESIAK, Piotr GUZDEK, Piotr MAĆKÓW, Tomasz MAJ, Artur POLAK, Dariusz SOLNICA, Paweł IWANICKI - Intelligent Multi-Channel Lighting Systems Based on SSL LED Technology	161
38	Waldemar WOJCIK, Maksat KALIMOLDAEV, Rustem BIYASHEV, Nursulu KAPALOVA, Ardak AKHMETOVA, Salima NUGMANOVA, Yelzhassar MERGENBAYEV - Creating an algorithm of encryption based on prime numbers in positional systems of calculating residual classes	164
39	Robert SMYK, Maciej CZYŻAK - Implementation of multi-operand addition in FPGA using high-level synthesis	170
40	Jacek BIERANOWSKI, Daniel CHLUDZIŃSKI, Łukasz GAJO - Project and techno-economic analysis of hybrid power systems with extended heat accumulation in single-family housing	174
41	Jolanta FIEDUCIK, Jan GODLEWSKI - Matter cooling by anti-Stokes fluorescence	178
42	Wojciech MATELSKI - IM drive system supplied from PV panels with energy storage – experimental setup	183
43	Zbigniew ŁUKASIK, Jacek KOZYRA, Aldona KUŚMIŃSKA-FIJAŁKOWSKA - A method of calculating CO ₂ emission savings obtained by the use of innovative technology of photovoltaic roof of cars supporting battery charge	189
44	Sławomir SOWA, Aniela KAMIŃSKA - Predicted reduction of energy consumption in the school building by lighting control with KNX system	193
