

Contents

- Roman KWIECIEŃ – Analysis of the functionality of OPC DA technology in the Windows development process	1
- Jakub FURGAŁ – Simulations of internal overvoltages in transformer windings using EMTP-ATP	5
- Stanisław CHUDZIK – Detection of defects in natural leather using active thermography	9
- Marek HRECZKA, Wojciech BURLIKOWSKI, Marta DUDEK-BURLIKOWSKA, Janusz HETMAŃCZYK, Aleksandra Kolano-BURIAN, Roman KOLANO – Minimization of losses in high-speed PM BLDC motors by using modern magnetic materials in the stator and changing the rotor design	14
- Tomasz NACZYŃSKI, Roman KORAB, Marcin POŁOMSKI – Short-term forecasting of the baseline load of the residential customer using historical data	20
- Mohd Mawardi SAARI, Nurul Ain NADZRI, Mohd Herwan SULAIMAN, Toshihiko KIWA – Hydrodynamic core size extraction of magnetic nanoparticles using non-regularized non-negative inversion of combined real and imaginary magnetic responses	26
- Jakub PRZYDALSKI, Radosław WAJMAN – Renaming a JavaScript object key while preserving its original structure on the example of a graphical JSON editor application	30
- Mohamad Aiman Hadi MOHAMAD NAZER, Mohamad Kamal A. RAHIM, Noor Asniza MURAD, Noor Asmawati SAMSURI, Aloysius Adya PRAMUDITA, Bambang Setia NUGROHO, Sunti TUNTRAKOOL, Norsaidah MUHAMAD NADZIR – UWB MIMO antenna design and analysis at millimetre wave frequencies	34
- Marian HYLĄ – Analysis of the of reactive power compensation possibilities in a mining plant – case study	39
- Szymon BRZEZIŃSKI, Krzysztof STEBEL – Q-Learning algorithm for PI controller autotuning	44
- Paweł PIJARSKI, Piotr KACEJKO, Adrian BEŁOWSKI – Selected criteria for the assessment of RES in terms of the analysis of the possibility of connecting them to the grid	49
- Tarana NURUBEYLI, Zulfuqar NURUBAYLI, Elbrus AHMEDOV, Ismayil ISMAYILOV – Comparison of radio frequency current transformers and Rogowski coils for accurate partial discharge monitoring	57
- Antoni SAWICKI – Mathematical models of electric arc with variable length using column radius as a state variable	62
- Lukas VEG, Michał JELEŃ, Anton RASSÖLKIN, Mariusz STĘPIEŃ, Marcin ZYGMANOWSKI – Modern training courses increasing awareness of environmental protection	66
- Krishnamoorthy V., Logeswari S., Sivanantham S., Akshaya V., Ganagavalli K., Mohanraj V. – Glaucoma detection with the segmentation of optic disc and cup region using improved u-net and classification algorithm	71
- Jakub FURGAŁ – Simulations of lightning overvoltages in overhead transmission lines using EMTP/ATP	77
- Milan SMETANA, Daniela GOMBÁRSKA, Martin ĎURČO – Investigation of defects of artificial BSCC heart valves using radiographic computational methods	81
- Viktor TROKHANIYAK, Stanislav KOVALCHUK, Mykola ZABLODSKIY, Viktor KAPLUN, Svitlana MAKAREVYCH – Neuro-short-term demand forecasting model of territorial communities energy islands with electricity and heat combined generation	85
- Natalia PIEGAT, Wojciech KIJASZEK, Sergiusz PATELA, Artur WYMYSŁOWSKI – Influence of ellipsometric data type on SiO ₂ thickness prediction accuracy for different machine learning algorithms	89
- Bouziane GHOUAL, Benyssaad YSSAAD, Youssouf MEDDAHI, Bouziane MELIANI – Comparative performance of POA and GWO-enhanced backstepping control for robust 6DOF drone path tracking in windy conditions	94
- A. H. AHMAD ABAS, Mohammad Syuhaimi AB-RAHMAN, M. Hazwan WAHAB, Norhidayah AHMAD – Temperature sensitivity of polymer optical fiber: a study of PMMA, PVDF, and PI in fiber to the home network	100
- Tomasz TRAWIŃSKI, Damian BŁASZCZOK – Analysis of capacitive reactive power consumption on the example of a service building – a case study	104
- Waldemar DOŁĘGA, Wojciech FOLKMAN – Network investment risks	110
- Łukasz GORGOLEWSKI – The scope and form of the fire protection device design using the example of a fire power switch	114
- Zbigniew LUBOŚNY – Transformation of electric power grids in the 2050+ horizon	118
- Konrad SEKLECKI, Leszek S. LITZBARSKI, Marek OLESZ, Emanuel GIFUNI, Grzegorz REDLARSKI, Jacek GROCHOWSKI – Selecting an inverter for a PV micro-installation	121
- Tomasz NOWAK – Review of experiences with off-grid PV installation	124
- Waldemar DOŁĘGA – Transformation of the national distribution network - selected aspects	127
- Konrad SEKLECKI, Kamil J. BALCAREK, Marek OLESZ, Kornel BOROWSKI, Leszek S. LITZBARSKI – Charging points in underground garages of multi-family buildings in Poland: current status, challenges and development prospects	130
- Stanisław CZAPP, Kornel BOROWSKI – Testing the operation of the RDC-DD protection under selected residual current waveforms	133

Contents

- Marek OLESZ, Leszek S. LITZBARSKI, Bolesław BARSZCZ, Kamil KĘDZIERSKI, Bartłomiej ANDRZEJEWSKI – Application of materials science in the investigations of power cable damage	137
- Marek OLESZ, Mikołaj NOWAK, Leszek LITZBARSKI, Paweł SZWARCZEWSKI – Electric field around a 110 kV line pole with a communication system	140
- Izabela PRAŻUCH – Analysis of the impact of changes in photovoltaic installation billing on their technical and economic efficiency	144
- Michał K. URBĄSKI, Kinga WÓJCICKA, Karol BOLEK, Paweł WÓJCICKI, Maksymilian BIAŁAS – Fuzzy approach to analyze measurement uncertainty on the example of magnetic field measurement	147
- Michał BORECKI, Jan SROKA – Ex post droop correction of the current probe by measurements of pulses	152
- Zbigniew OMIOTEK – Dangerous items' detection in surveillance camera images using Faster R-CNN	156
- Brahim CHEROUATI, Youcef FEKIR, Mohamed SENOUCI – Automatic identification of Algiers dialect based on word-level machine learning and deep learning methods	169
- Maciej CHOJOWSKI – Exploring bandwidth requirements for high-speed measurements in power electronics	174
- Azdiana MD YUSOP, Muhamad Izwan MAWARIDY, Noor Asyikin SULAIMAN, Khairun Nisa KHAMIL, Ramizi MOHAMMED, Juwita MOHD SULTAN, Muhammad Faiz NORHISHAM – A thermal management system to reuse thermal waste released by high power light emitting diodes (LED)	181
- Krzysztof SKRZYPCZYK, Damian BERESKA – An application of RFID technology to mobile object's pose estimation in 2D space	188
- Marek KUCHTA, Jacek JAKUBOWSKI, Roman KUBACKI, Rafał BIAŁEK, Piotr PAZIEWSKI – High-Power, Pulsed Electromagnetic Field Training-Range Meter, Pm-Hpm1	194
- Jacek KORYTKOWSKI, Kazimierz MIKOŁAJUK, Krzysztof SIWEK, Andrzej TOBOŁA – Steady state component of the short-circuit current in the electrical grid	199
- Mohd Ikhwan MUHAMMAD RIDZUAN, Nur Nabihah Rusyda ROSLAN, Ahmad Zairi MOHD ZAIN, Ruhaizad ISHAK – Enhancing power system reliability: a regulatory-based Monte Carlo simulation of worst-served customers and penalty risks	206
- Łukasz DRÓŻDŻ, Jerzy ROJ – Propagation of the Deterministic Errors by the Discrete Wavelet Transform algorithms	213
- Paweł SŁOWAK – Factor Graph-Based Trajectory Estimation for Radar-Based Missile Tracking	217
- Abderrahim BAKIR, Abdelkader RAMI, Riyadh BOUDDOU – A novel optimized hybrid deep neural network for accurate short-term electricity price forecasting in smart grids	222
- Marek PISZCZEK, Aleksandra KUCHARCZYK-DRAB, Adam PISZCZEK – ArduCam vision sensors for cosmic-ray detection and analysis	234
- Agron BISLIMI – Comparative evaluation of initialization methods for continuation power flow in power system stability	242
- Azzeddine Yasser NADHIR, Ghalem ABDELHAK, Naceri ABDELLATIF, Djeriri YUCEF – A comprehensive analysis of the Emperor Penguin Optimizer in optimizing a smart photovoltaic systems	249
- Abdelfettah KERBOUA, Ahmed LEMRABOUT, Fouad BOUKLI HACENE, Luis F. RBEIRO – PSO-driven optimal sizing of a hybrid system for enhanced renewable energy integration in Algerian buildings	255
- Piotr MAJDAŃSKI, Karol WRÓBEL, Rafał ZAWIŚLAK – State estimation of a two-mass system using a convolutional neural network	262
- Tomasz ŁUKASZEWICZ, Dariusz KANIA – Signature of fifths in the process of detecting the tonal mode of a musical piece	267
- Vasyl SHYNKARENKO, Anna SHYMANSKA, Viktoriia KOTLIAROVA – Taxonomy and genetic evolution of electromechanical energy converters of the Spherical Genus	271
